

Länge des Profils: 166mm  
Gesamtlänge = Profillänge + 2x Abdeckkappe.

Abmaße der Frontplatte: 166mm x 89,8mm x 2mm ①

Werkstoffe:  
Delta-Box = Aluminium-Strangprofil  
Endkappen = ABS  
Frontplatte = Aluminium, eloxiert

|                                                                                                                                                                                                                            |  |  |                                                                   |  |                                               |  |                                                 |  |                                                                                                                        |                                                                                                  |  |
